<a href="#">University Committees Policy</a>
<b>Policy Summary</b> This policy establishes basic organizational principles and operating procedures that will apply to and govern committees formed by the Chancellor, Provost, or a Vice Chancellor to address University-wide matters. The policy defines the term “University Committee” for purposes of the policy and provides details as to how those committees will be operated and supported. By its terms, the policy applies only to a subset of committees that might be formed and operate within the University.
<b>Interpretation/Implications of the Policy</b> The policy is intended to incorporate principles of good governance and promote committee operations that make best use of committee members’ time, while meeting the objectives and tasks assigned to committees. As the policy is implemented, members of the University committee should come to expect and rely on the transparency and operating principles that the policy requires.
